Amendment No. 0001
23 April 2004

SUBJECT: Amendment No. 0001 to Specifications and Drawings for Construction of
Solicitation No. W9128F 04 B 0009, Bank Stabilization, Short Creek,
Big Bend Project, Chamberlain, SD.

TO: Prospective Bidders and Others Concerned

1. The specifications and drawings for subject project are hereby modified
as follows (revise all specification indices, attachment lists, and drawing
indices accordingly).

a. Specifications. (Descriptive Changes.)

(1)Section 02245, Add the following paragraphs

"1.2.4. Measurement and Payment Excavation/ Backfill for Work Platform

The unit of measurement for excavation and borrow will be by the cubic yard, computed by the average end area method from cross sections taken before and after the excavation and/or borrow operations. The contractor shall be responsible for all surveys need to show quantities of material moved. The volume to be paid for will be the number of cubic yards of material measured in its original position and removed from the excavation and borrow areas, including the excavation for ditches, gutters, and channel changes, when the material is acceptably utilized as backfill or disposed of as herein specified. The measurements will include authorized excavation of rock, authorized excavation of unsatisfactory subgrade soil, and the volume of loose, scattered rocks and boulders collected within the limits of the work; allowance will be made on the same basis for selected backfill ordered as replacement. The measurement will not include the volume of subgrade material or other material that is scarified or plowed and reused in-place, and will not include the volume excavated without authorization or the volume of any material used for purposes other than directed. The volume of overburden stripped from borrow pits and the volume of excavation for ditches to drain borrow pits, unless used as borrow material, will not be measured for payment. The measurement will not include the volume of any excavation performed prior to the taking of elevations and measurements of the undisturbed grade.

In lieu of surveys, the contractor and COR by agreement may determine quantities of material used by utilizing full loaded truck capacities minus a 20% shrinkage factor for lossage and compaction of hauled borrow or excavated material. This agreement will be based on the fully loaded trucks and submission of load transfer tickets showing transport of material from the

borrow site to the site of placement.

1.2.5. Topsoil Payment

Separate excavation, hauling, and spreading or piling of topsoil and related miscellaneous operations will be considered subsidiary obligations of the Contractor, covered under the contract unit price for excavation."

b. Specifications (New and/or Revised and Reissued). Add specification pages as noted below.

Pages Added

Index to Section 02245 - goes at the before Section 02245

2. This amendment is a part of the bidding papers and its receipt shall be acknowledged on the Standard Form 1442. All other conditions and requirements of the specifications remain unchanged. If the bids have been mailed prior to receiving this amendment, you will notify the office where bids are opened, in the specified manner, immediately of its receipt and of any changes in your bid occasioned thereby.

a. Hand-Carried Bids shall be delivered to the U.S. Army Corps of Engineers, Omaha District, Contracting Division (Room 301), 106 South 15th Street, Omaha, Nebraska 68102-1618.

b. Mailed Bids shall be addressed as noted in Item 8 on Page 00010-1 of Standard Form 1442.

3. Bids will be received until 2:00 p.m., local time at place of bid opening, 07 May 2004.
